Nature-Based Solutions to Increase Community Resilience Against Climate-Induced Disasters

The project aims to reduce community vulnerability to climate-induced disasters by implementing nature-based solutions. The project will conduct comprehensive assessments of vulnerability, design tailored interventions, and engage with local communities, government agencies, and civil society organizations. A participatory approach will empower communities with the necessary knowledge and skills.

Project's results: 4 organizations cooperating across borders, 3 jointly developed solutions.

Partners:

Lead partner: Georgian Institute of Public Affairs

Partner 2: Ecolution Georgia

Partner 3: WRI Türkiye

Partner 4: Forest Research Institute – Hellenic Agricultural Organization DIMITRA

Call: First call for SMALL SCALE projects

Priority: 02 - Clean and Green Region

Specific objective: RSO2.4 - Promoting climate change adaptation and disaster risk prevention, resilience, taking into account eco-system based approaches.

Total budget: 549.899,00 €

Interreg funds: 494.909,10 €
